

Q1. Create a simple webpage using HTML

Code:

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
<meta charset="UTF-8">
```

```
<title>My Simple Web Page</title>
```

```
</head>
```

```
<body>
```

```
<h1>Welcome to My Web Page</h1>
```

```
<p>This is a simple HTML page.</p>
```

```
<button>Click Me</button>
```

```
</body>
```

```
</html>
```

Q2. Create a HTML page, which has properly aligned paragraphs with image along with it.

Code:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <title>Image with Paragraph Alignment</title>

  <style>

    body {

      font-family: Arial, sans-serif;

      margin: 40px;

    }

    .content {

      display: flex;

      align-items: flex-start;

    }

    .content img {

      width: 200px;

      height: auto;
```

```
margin-right: 20px;  
border-radius: 8px;  
}
```

```
.content p {  
    text-align: justify;  
    line-height: 1.6;  
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<h1>HTML Page with Image and Paragraph</h1>
```

```
<div class="content">
```

```

```

```
<p>
```

HTML is the standard markup language used to create web pages.

It helps structure content such as text, images, and links.

With the help of CSS, we can align elements properly and make the webpage visually appealing and easy to read.

</p>

</div>

</body>

</html>
